TECHNICAL SKILLS

Languages: C/C++, Python, Java, JavaScript/TypeScript, SQL

Tools: Linux/Unix, Git, Perforce, GDB, Docker

Frameworks & Libraries: STL, Flask, Scikit-Learn, NumPy, Pandas, Node.js, REST APIs

Core Competencies: OOP, Data Structures & Algorithms, Memory Management, Machine Learning, Debugging, Unit Testing, CI/CD, Agile/Scrum

EXPERIENCE

Backend Developer

Aug 2026 – Present

JAM CRM

Toronto, ON

- Developing applications, dynamic microsites, and web forms using **Python**, **REST APIs**, **JavaScript**, and **SQL**.
- Supporting serverless **AWS** infrastructure (Lambda, API Gateway, S3) and **CI/CD** pipelines with **Git**.

Teaching Assistant (Intermediate Programming)

Sept 2025 – Apr 2026

University of Guelph

Guelph, ON

- Taught C programming labs and office hours for **30+ students**, covering debugging, pointers, and memory management.
- Designed and graded assignments and quizzes; configured **GitLab** infrastructure for the course.

UI Engine Engineer

May 2025 – Aug 2025

Respawn Entertainment | AAA studio, creators of Apex Legends

Vancouver, BC

- Resolved a critical **UI automation soak bug** blocking the scripting team, achieving **100% first-run test reliability**.
- Fixed UI bugs and improved automated test coverage across the production **C++** codebase on **Linux/Unix**.

IT Systems Support Analyst

Jan 2025 – May 2025

University of Guelph

Guelph, ON

- Automated internal workflows with **PowerShell** scripting, reducing manual IT workload across **30,000+** users.
- Resolved **Office 365** and enterprise support tickets for students, faculty, and staff.

UI Engine Engineer

May 2024 – Aug 2024

Respawn Entertainment | AAA studio, creators of Apex Legends

Vancouver, BC

- Fixed **50+ critical UI bugs** in the production **C++** codebase, supporting stability for a 7-person engine team.
- Reworked **RTK system** error-handling in C++, cutting crash rates by **20%** and debugging time by **34%**.
- Led team discussions on **new error-handling standards**, driving adoption of safer C++ coding practices.

C++ Software Engineer

May 2023 – Dec 2023

Electronic Arts (EA) | One of the world's largest video game publishers

Vancouver, BC

- Authored **Python automation scripts** used by 14 engineers, improving onboarding efficiency by **80%**.
- Fixed **20+ critical bugs and crashes** in FC24 before global launch using **C++** and **OOP** on a **Linux/Unix** codebase.
- Built new screen features via ActionScript and the Frostbite engine; supported **Agile/Scrum** sprint planning.

PROJECTS

Two-Player Wildebeest AI | Python, Cython

Jan 2026 – Apr 2026

- Built a tournament AI for a custom 11x11 chess variant using **iterative deepening alpha-beta search** with a 200K-entry transposition table, move ordering, and dynamic time management.
- Optimized the search hot path with **Cython**; built a **JSON opening book** for early-game lookups.

Movie Recommendation System | Python, Scikit-Learn

Sept 2025 – Dec 2025

- Built content-based, collaborative filtering, and hybrid models on the MovieLens dataset using **TF-IDF**, cosine similarity, and **matrix factorization**; evaluated with RMSE and precision/recall.

Molecule Visualizer | C, Python, SWIG

Sept 2024 – Dec 2024

- Built a C library for molecular math compiled as Linux shared objects, exposed to Python via **SWIG bindings**; served via a Python **HTTP server** with REST endpoints and **SQLite** persistence.

EDUCATION

University of Guelph

Guelph, ON

Bachelor of Computing Honours, Minor in Applied Geomatics | GPA: 89%

Sept 2021 – May 2026

Achievements: Graduated with Distinction • Co-op Student of the Year Nominee (2025) • Dean's Honours List (every semester, Fall 2021 – Winter 2026)

Certification: HarvardX Data Science: Building Machine Learning Models, edX (2025)
